March 20205

An [REDACTED]

Hi Folks

What came in and what's coming at Winona Garden Railway

The new tank cars are here and now in stock. 4 numbers available. Also in is a CP flat car

I am told the 4 bay hopper cars and SD70's locos are currently in production, and hopefully see those mid summer.

For those that were interested in the CP GP38s that I had sent out a small survey on. The Maron and Gray script markings was a hands down winner, second place was the Multi mark. We have ordered production of both of those, also being produced will be the CN GP38 in stripe markings with 2 road numbers.

Another piece of rolling stock I am thinking about doing is a CN extended vision caboose in "INTERNATIONAL SERVICE" markings

I am seeing a great deal of people putting their names on the waiting lists for new products and then not going forth with the purchase, in some cases not even bothering to contact us about it and even more disheartening is that I am seeing the same names come up. So please if you are not interested in buying then don't put your name on something. This causes me a great deal of time and expense. In case of point is the 55' tank car, they were all spoken for, but with the unclaimed and without contact we have far too many now in stock. Leaving me with too much inventory that I was not planning for. There really is no point in making custom products that are sitting here unsold.
